## **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claims 1-9 and 11-13 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Claims 1, 4-5, 8 and 12 recite among other features having a first memory to sequentially store the video data corresponding to each of the data lines in a first direction, a second memory to store first correction data which is obtained by, for each data line, multiplying each of the video data read out from the first memory by a predetermined coefficient and then sequentially accumulating the multiplied data in a second direction opposite to the first direction, and a third memory to store second correction data as the cumulative value for each of the data lines, the second correction data being obtained by, for each data line, sequentially accumulating the first correction data read out from the second memory in the first direction.

However, Yamamoto et al (JP 07264591) discloses writing into memory in alternating directions (Drawing 2).

Yamamoto does not dislose storing first correction data obtained by multiplying each of the video data read out from the first memory by a predetermined coefficient and then sequentially accumulating the multiplied data in a second direction opposite to the first direction and storing second correction data obtained by sequentially accumulating the first correction data read out from the second memory in the first direction.

Art Unit: 2629

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pervan whose telephone number is (571) 272-0910. The examiner can normally be reached on Monday - Friday between 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amr Awad can be reached on (571) 272-7764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
